Started like a pan-Romanian forum, the conference has grown and reached the 9th edition attracting many specialists from different countries. The aim of the conference is to provide an opportunity for academics, practitioners and researchers to debate new achievements or concepts, approaches and innovative practices within the continuously progressing world of electromechanical and power systems.

TOPICS

- Automations & robots
- Electrical apparatus
- Electrical energy transport and distribution
- Electrical energy utilizations
- Electrical machines & drives
- Electrical traction and automotive equipments
- Engineering Education
- Electroecology
- Electromagnetic Field and Electrical Circuits
- Management and entrepreneurship
- Metrology
- Materials and Technologies in Electrical Engineering
- Power Electronics & Mechatronics
- Reliability and Diagnosis
- Power Generation & Renewable Energy

IMPORTANT DATES

- **15 June, 2013** – submission of an extended abstract
- **30 June, 2013** – notification of acceptance
- **31 August 2013** – submission of full papers & early registration payment
