Paper ID 1

Paper Title Perspectives on Railway Electric Traction System Improvement Brought by Monitoring the Impedance Bonds

Reviewer #2

Questions

- 1. Appropriateness to the Conference:**
Acceptable
- 2. Originality:**
Acceptable
- 3. Title and Abstract clearly communicate scope and outcome**
Good
- 4. Crucial previous work is described and referenced, with clear research scope and objective**
Good
- 5. Methodology and data are appropriate for research scope and related to findings**
Good
- 6. Results are properly described, visualized and discussed**
Average
- 7. Easiness of reading, including language, with sufficient length for the topic studied**
Acceptable
- 8. Presentation / Editorial Quality: Is the paper following the IEEE template instructions?**
Yes
- 9. What are the Strengths and Weaknesses ? Highlight contributions and problems that should be corrected.**
To be corrected:
 - In Introduction, line 3, do not use "rolling lines" which is more used used for bowling or for transportation as belt and less for railways. You may use "rail" and/or "track".
 - In Introduction it is mentioned: "all the railway lines in Romania were electrified". It is obvious that not ALL the railway lines are electrified. Please identify and mention into the paper how large the railway network in Romania is and how much is electrified.
 - In Part II, above Fig. 1, there is a mention regarding the Maglev trains in three countries. Please mention the reference regarding the voltage supply for these trains.
 - Please specify the future researches to have into attention on the subject, not only the benefit of it. (Proposal on how to improve monitoring?)
 - In the Conclusions: the mention on Maglev and fast train as hyperloop are redundant and not related to the subject.
 - English and text correction to be verify. Just small correction to make.
- 10. Confidential comments to Chair: For rejected papers clearly justify your decision.**
Accept with some corrections.
- 12. Overall Rating:**
Accept

Paper ID: 1

TITLE AND ABSTRACT

* Title: Perspectives on Railway Electric Traction System Improvement Brought by Monitoring

* Abstract: After a short history about the beginnings of the railway electric traction systems, in the paper are presented the elements that have an interest in being monitored for the railway electric traction power system in single-phase alternating current with the frequency of 50 Hz and voltage 25 kV, specific to the railway electric traction in Romania. The return of the traction current to the source is realized by the return circuit that incorporates the impedance bonds, called joint coils in Romania. Also, the paper highlights the benefit of monitoring the impedance bonds from the return circuit of railway electric traction power supply system. The benefits of monitoring the joint coils from electric traction consist of real-time knowledge of currents through the two primary windings of the impedance bond, 833 characters left

Click on "here" to Complete the online IEEE Copyright form

Submit IEEE Copyrigh Form :

The screenshot shows a web browser window with the URL `ecopyright.ieee.org/ECTT/IntroPage.jsp`. The page title is "IEEE Publication Agreement" and it features a navigation bar with links to "IEEE.org", "IEEE Xplore Library", "IEEE Standards", and "IEEE Spectrum". A progress indicator at the top shows five steps, with the first step highlighted in orange. The main content area is titled "Welcome" and contains the following text:

> The following steps will lead you through the process of either transferring copyright or licensing publishing rights to IEEE.

- STEP 1: Confirm article information.
- STEP 2: Confirm article originality and signing authority.
- STEP 3: Select the appropriate publishing agreement.
- STEP 4: Sign the publication agreement.
- STEP 5: Download the signed publication agreement.

On the right side of the page, there is a "Select Language" dropdown menu and a section titled "About signing this agreement" which contains the following text:

As corresponding author, or authorized agent, you will be signing on behalf of all your co-authors. Therefore, please be sure to confirm any changes with them.

This digital Publication Agreement uses a digital signature, which requires an author sign-in to use.

A red box highlights the "Start" button, and a blue arrow points to it with the text "Click on 'Start'" written in red.

At the bottom of the page, there is a footer with links for "Home", "Contact & Support", "Nondiscrimination Policy", and "Privacy & Opting Out of Cookies". Below this, it states: "© Copyright 2021 IEEE - All rights reserved. Use of this Web site signifies your agreement to the IEEE [Terms & Conditions](#)".

▶ **IEEE Policies on Plagiarism:**

Article Title: Perspectives on Railway Electric Traction System Improvement Brought by Monitoring the Impedance Bonds

Authors: ALIN DRAGOMIR

Publication with IEEE is subject to the policies and procedures as described in the IEEE PSPB Operations Manual. Authors must ensure that their Work meets the requirements as stated in Section 8.2.1 of the *IEEE PSPB Operations Manual*, including provisions covering originality, authorship, author responsibilities and author misconduct.

I have read and agree to IEEE policies related to plagiarism and other forms of publishing misconduct.

[Back](#) [Continue](#)

About Plagiarism

IEEE defines plagiarism as the reuse of someone else's prior ideas, processes, results, or words without explicitly acknowledging the original author and source. It is important for all IEEE authors to recognize that plagiarism in any form, at any level, is unacceptable and is considered a serious breach of

About Similarity Check

IEEE takes the protection of intellectual property seriously. Accordingly, all submissions will be screened for plagiarism using Similarity Check. By submitting your work you agree to allow IEEE to screen your work. For more information please visit: <https://www.crossref.org/services/similarity-check/>

Continue

Please specify if any of the above applies to you

Click on "Continue"

Employment status = copyright status

An author's copyright status is determined to a large extent by the type of employer for whom the author works. For example, if you are employed by the U.S. Government, and you are the sole author of your paper, then you should select "Employed by United States Government."

Similarly, if you are the sole author and you are employed by a Crown Government (or if you and all your coauthors are Crown Government employees), then copyright to your paper will remain with the Crown Government. You should select "Employed by a Crown Government."
